

Oldest Tree on the Trail

This Old Cypress is 250 years old! Although this tree has been here for many years, there are few like it in this area today. In the 1960s, most of the trees along the shore were removed to prevent future flood damage. Most of the trees you see on the Trail today were planted by The Town Lake Beautification Committee in the 1970s & 1980s. Since 2003, The Trail Conservancy, with thousands of volunteers, has planted over several thousand trees!
