

Holly

The [Holly](#) Street Power Plant was active for 47 years until community efforts led to its closure in 2007. Now, you can savor breathtaking lake views and observe local wildlife along the newly completed Holly Lake Trail. This section not only realigns the Trail to be ADA-accessible but also restores the shoreline's natural habitat.

Stay tuned for the upcoming Holly Project, which will bring a fishing pier, extra seating, enhanced lighting, and native plant restoration to further support our urban forest and preserve the shoreline for wildlife.
